Dear Council members,

I am writing to you in support of CB17 which strengthens the APFO school test for slowing development in overcapacity areas. This gives additional, much needed time for the school district to balance resources and plan better to build schools utilizing state and local funding (like the overdue impact fee increase) better. Please help improve the experience for our children, and focus on sustainable growth, utilizing and fortifying APFO as the centerpiece it should be, today.

Thank you,
Brian Vivrette
