

Cory Josef Summerson

EXPERIENCE:

1987 – Date **BALTIMORE GAS and ELECTIC COMPANY**

A subsidiary of Exelon Corporation, which distributes electricity and natural gas in Maryland.

2011 – Date **Director – Substations & Transmission**

- Directs the safe, economical, reliable and profitable multi-faceted 145 person team that provides ownership of all BGE transmission, distribution and major customer substations and all BGE overhead transmission assets while ensuring aesthetic and environmental compliance.
- Directs a 24/7 substation shift operation responsible for performing planned and emergency switching & grounding up to 500kV as well as performing substation troubleshooting and regular inspections.
- Directs all planned and unplanned maintenance of electrical systems and equipment in BGE electric substations; including diagnostic testing, analyzing test results, mechanical maintenance, adjustments and overhaul to assure reliable operation of substation equipment and systems.
- Directs the construction and installation of structural, mechanical, and electrical equipment, systems and facilities in BGE's electric substations.
- Directs the construction, planned and unplanned maintenance, inspection of BGE's overhead transmission system and the Light Speed communication infrastructure on the BGE transmission system.

2007 – 2011 **Director – Resource & Workload Management**

- Directed a multifaceted team of 90 that coordinated and scheduled the planned maintenance and construction activities of the BGE's field forces.
- Ensured the preparation of the detailed long range schedule for all work; analyzed the work plan to efficiently schedule internal department resources; prepared specifications & managed contractors when internal resources were insufficient to meet the workload.
- Directed the analysis and re-deployment of internal resources under system emergencies as needed; maintained a backlog of routine work to redirect internal resources when unplanned events occurred.
- Ensured that detailed & complete packages were received for the department's internal resources, including a final estimate, scope of work, full set of drawings, materials, account numbers, and outage schedules for the crews to complete their tasks.
- Ensured the preparation and maintenance of contract specifications and documents for all department work; ensured contractors maintained department standards for work practices, quality, and safety.
- Directed development and monitoring of performance indicators and metrics for the entire department and areas outside the department that directly influenced the department's work.

2006 – 2007 **Director – New Business Growth & Design**

- Directed a large team responsible for the communications, engineering and design for the installation of new/relocated gas and electric facilities for all classes of customer.
- Managed relationships with developers, builders and county agencies.
- Assured that all standards and procedures were in accordance with applicable codes, rules, regulations, and with established policies of engineering, economics, safety, reliability, and environmental impact.
- Responsible to make improvements and modifications in processes, procedures, and standards to improve customer satisfaction and reduce costs.

2002 – 2006 **Director – Customer Reliability Assurance**

- Directed the team responsible to investigate, inspect, test and monitor services to support operations and maintenance of the electric distribution system.
- Assured that the performance of the distribution system met or exceeded the requirements of the regulatory agencies and industry standards, and abnormal operations were detected and corrected promptly.
- Served as a liaison between the Company and community groups and associations in matters relating to the operations of the distribution system.
- Fostered good working relationship with customers.
- Directed customer service investigators that handled service inquiries and damage claims and ensured fair and equitable treatment was provided our customers.

2000 – 2002 **Supervisor – Resource & System Planning**

- Supervised the development of the overall resource plan for the Electric Transmission & Distribution Division.
- Responsible for the development of service level agreements for various corporate services to the Electric Transmission & Distribution Division.
- Directed special studies to reduce costs involving manpower, vehicle and equipment usage, and contracted services.

1991 – 2000 **Various Supervisor Roles – Residential Services, Outdoor Lighting & Customer Reliability**

- Supervised activities involving the design of new residential services, relocation of electric and gas facilities for private and municipal requests.
- Responsible for the sales, engineering, and design of outdoor lighting for private, commercial and municipal entities.
- Responsible for interpreting the regulatory requirements and public service commission's tariff as it applied to residential customers, municipal entities, commercial customers and the Company.

1987 – 1991 **Various Engineering Assignments**

- Engineered various system improvement projects for the electric distribution system.
- Conducted special studies and was responsible to develop and revise standards and material specifications for electric distribution work practices, materials and equipment.
- Managed electric reliability and system voltage programs for the electric distribution system.

EDUCATION:

- 1993 – Loyola University, Baltimore MD
Master of Business Administration
- 1987 – Pennsylvania State University, University Park PA
Bachelor of Science – Electrical Engineering

ASSOCIATIONS/INTERESTS:

Leadership Howard County (2010-2011)
Waverly Woods HOA Board member (2011-2012)
Youth Coaching Positions – Soccer/Football/Basketball (1998-2008)
