4. Please provide a brief statement concerning the reason(s) the requested amendment(s) to the Zoning Regulations is (are) being proposed.

In response to concerns related to potential large scale mulch and composting facilities in western Howard County, Zoning Regulation Amendment 149 (Council Bill 20-2014, effective August 4, 2014), amended the 2013 Zoning Regulations by reinstating certain Zoning Regulations that were in effect prior to 2013. Subsequently, a Task Force was created to study mulching, composting and wood processing policies and regulations with respect to Howard County land use, planning processes and Zoning Regulations. Additionally, in 2015, Maryland Department of the Environment (MDE) revised and updated the State's composting regulations.

Subsequent to the Task Force's final report (found at:

http://cc.howardcountymd.gov/LinkClick.aspx?fileticket=H_2zmFwSRjQ%3d&portalid=0), the Department of Planning and Zoning met with a smaller group of Task Force participants to design zoning regulations. Although there wasn't complete agreement on the final draft presented here, these changes from some of the original findings represent a collaborative effort.

This ZRA proposes regulatory changes that recognize the importance of farming to the County and avoid undue burdens on farmers as they conduct agricultural activities while simultaneously addressing concerns of residential neighbors related to large scale mulch and composting operations and incorporating MDE's recently revised composting regulations.

5. Please provide a detailed justification statement demonstrating how the proposed amendment(s) will be in harmony with current General Plan for Howard County.

PlanHoward 2030 discusses the interplay of agricultural and commercial uses and recognizes that "In a

practices so they too can adapt to the evolving market. Enhancing their ability to farm efficiently is critical to the growth of Howard County and its ability to maintain a diverse economy. However, new development plans and conditional uses should include better buffers to reduce conflicts with neighboring residents.”

Policy 4.5 seeks to “Refine the RC and RR zoning regulations to provide greater flexibility for the agricultural community as well as appropriate protections for rural residents.” The proposed amendments are consistent and attempt to implement this policy.

6. The Legislative Intent of the Zoning Regulations in Section 100.A. expresses that the Zoning Regulations have the purpose of “...preserving and promoting the health, safety and welfare of the community.” Please provide a detailed justification statement demonstrating how the proposed amendment(s) will be in harmony with this purpose and the other issues in Section 100.A.

All proposed amendments are in harmony with the legislative intent of the Howard County Zoning Regulations. Specifically, Section 100.0.A.2. of the Howard County Zoning Regulations indicates that it is the intent of these Regulations “To protect the character, the social and economic stability of all parts of the County; to guide the orderly growth and development of the County, and to protect and conserve the value of land and structures appropriate to the various land use classes established by the General Plan for Howard County, and by these comprehensive Zoning Regulations”.

7. Unless your response to Section 6 above already addresses this issue, please provide an explanation of the public benefits to be gained by the adoption of the proposed amendment(s).

Promote the orderly growth of the County while balancing concerns of the farming community with residential neighbors.

8. Does the amendment, or do the amendments, have the potential of affecting the development of more than one property, yes or no? Yes. The proposed amendments permit Natural Wood Waste Recycling and Composting as an accessory use and Natural Wood Waste Recycling and Composting Facilities as a matter of right, by permit, or by conditional use, with limitations, on properties in the RC, RR, M-1, M-2 and SW zoning districts.

If yes, and the number of properties is less than or equal to 12, explain the impact on all properties affected by providing a detailed analysis of all the properties based upon the nature of the changes proposed in the amendment(s). If the number of properties is greater than 12, explain the impact in general terms.

9. If there are any other factors you desire the Council to consider in its evaluation of this amendment request, please provide them at this time. Please understand that the Council may request a new or updated Technical Staff Report and/or a new Planning Board Recommendation if there is any new evidence submitted at the time of the public hearing that is not provided with this original petition. See the Maryland Department of the Environment Composting and Natural Wood Waste Recycling Facility Permit Applications (Exhibits A and B), which detail the various State requirements necessary for approval of the uses. Also, see the NFPA 1, Fire Code 2015 Edition (NFPA 2015) that is incorporated by reference in Howard County 2015 Fire Prevention Code (HoCo FPC 2015). In addition to requirements in the NFPA 2015, the HoCo FPC 2015 provide certain additional requirements specific to Mulch / Wood Processing facilities and Natural Wood Waste Recycling / Composting facilities.

10. You must provide the full proposed text of the amendment(s) as a separate document entitled “Petitioner’s Proposed Text” that is to be attached to this form. This document must use this standard format for Zoning Regulation Amendment proposals; any new proposed text must be in CAPITAL LETTERS, and any existing text to be deleted must be in [[Double Bold Brackets]]. I. Permits for Special Farm Uses

The Department of Planning and Zoning may approve permits for the following categories of uses, which are related to farming and agriculture. A permit shall only be approved if the Department of Planning and Zoning finds that the proposed use conforms with the criteria given below and that are listed for each category.

Except for the value-added agricultural processing category, the Pick-Your-Own Enterprises category, [[and]] the small farm stand category, AND THE EMERGENCY NATURAL WOOD WASTE RECYCLING CATEGORY all other categories above shall comply with the requirement that the lot or parcel upon which the operation is located shall have frontage on and direct access to a road classification as an arterial or collector public road, or may front on and have direct access to a local road, if:

- (1) Access to an arterial or collector public road right-of-way is not feasible;
- (2) The access to the local road is safe based on road conditions and accident history;
- (3) That the use of the local road for access will not unduly conflict with other uses that access the local road.

The petitioner shall submit a request for a permit in writing, either in a letter or using a form provided by the Department of Planning and Zoning. The request shall specify the proposed permit category and provide a written description of the use and justification addressing how the proposed use compiles with the criteria applicable to the use. The petitioner shall specify

the address of the property for the proposed use, and shall provide a mailing address, if different, a phone number and an email address if used, for purposes of future communication about the request.

For categories which will include visits to the property by customers or participants, the request shall specify the requested hours of operation of the use. In approving a permit, the Department of Planning and Zoning may reduce the hours of operation if it determines that this will reduce adverse impacts on adjacent properties.

The permit request shall include a plan of the property depicting the location and dimensions of structures, parking areas, driveways and landscaping used to buffer any adjacent residential development.

If the Department of Planning and Zoning determines that the proposed use is not in compliance with the applicable criteria, it shall inform the petitioner as to what is necessary to achieve compliance.

UNLESS OTHERWISE SPECIFIED BELOW, once a permit is approved and is issued, the permit shall be valid indefinitely provided that the operation of the approved use remains in full conformance with all aspects of the use as it was approved. The permit holder shall apply for a renewal of the permit if significant changes to the operation are being proposed, including but not limited to new uses or structures, in which case the originally approved plan must be revised to indicate the proposed changes and submitted for a new approval.
