## **Apartment and Condominium Recycling**

State law requires apartment buildings and condominiums with 10 or more dwelling units (“Multi-family Communities”) to provide recycling of plastic, metal, glass containers, and paper for their residents. Multi-family Community recycling must be carried out in accordance with the requirements of the County Solid Waste Management Plan. This section of the County Waste Solid Waste Management Plan details the requirements for Multi-family Community recycling.

In order to implement State law, the County has notified all Multi-family Communities in the County of the new recycling requirement. Before March 15, 2014, the County will provide all Multi-family Communities in the County with the County Apartment and Condominium Recycling Plan and information about developing and submitting a proposed Recycling Plan to the County. The County requires that each Multi-family Community existing as of December 31, 2013, submit a proposed Recycling Plan to the Howard County Recycling Division before May 1, 2014.

Once the County approves the Recycling Plan, the Multi-family Community must begin publicizing the Recycling Plan to their residents. Multi-family Communities must provide weekly recycling collection in accordance with an approved Recycling Plan by October 1, 2014.

For new construction or redevelopment of Multi-family Communities, the site development plan must be reviewed by the Bureau of Environmental Services to verify accommodation is made for recycling. Recycling Plans must be approved before Use and Occupancy is issued and recycling collection must commence when the Multi-family Community has at least one resident.

Howard County maintains a list of Multi-family Communities that is updated every 3 years. Interested parties may call the Howard County Recycling Division at 410-313-6444 to obtain information about the list or for assistance with development of a Recycling Plan.

The Property Owner or Manager of an apartment building that contains 10 or more dwelling units or the Council of Unit Owners for a Condominium that contains 10 or more dwelling units (the “Responsible Party”) are responsible for submitting and implementing the Recycling Plan.

### **Multi-family Community Recycling Plans**

At a minimum, the Recycling Plan must include the following:

- A map of the property showing all buildings and the intended location of all recycling collection containers.
- A description of the number, size, type, and color of collection containers.
- A description of the weekly transportation of the recyclables, to a Recyclables Processor, End-user, or to the Alpha Ridge Landfill.
- A description of how the recyclables will be marketed.

- A description of efforts to educate residents about the Recycling Plan and examples of the materials used to communicate the Plan to residents.
- Inspection and monitoring plans to verify that the Recycling Plan is properly implemented.

### **Annual Report**

Responsible Parties must provide an Annual Report to the Howard County Recycling Division by March 1 of each year, which covers the previous Calendar Year and provides the following information:

- Beginning and end dates for all services that began and ended in the previous Calendar Year.
- Contact information for all transporters of recyclables, whether the Responsible Party self-hauls or contracts with a third party.
- Contact information for all Recyclables Processors, End-users, or Brokers used to dispose of recyclables during the previous Calendar Year.
- A copy of at least one invoice for all third party haulers, Recyclables Processors, End-Users, or Brokers used during the previous Calendar Year.
- The total number of tons of recycling that were hauled from the Multi-family Community during the previous Calendar Year.
- Documentation of efforts to communicate the Recycling Plan to residents.
- A letter signed by the Responsible Party that states that the residents of the Multi-family Community have had access to a weekly service with the minimum number, type, size, and color of collection containers approved by the County in the Recycling Plan.

### **Monitoring and Enforcement**

The Howard County Recycling Division will monitor the performance of each Recycling Program. The County has the right to inspect any Multi-family Community to assess any element of the Program. If the County identifies any deficiencies, the Responsible Party has 30 days to correct these deficiencies upon written notification by the County.

The Recycling Division may require changes to an approved Plan. In addition to the information provided in the Annual Report, Responsible parties must provide documentation related to the Recycling Plan, when requested by the County.

Any Responsible Party who does not implement their Recycling Plan, does not submit an Annual Report, or does not cooperate in providing access or information about its recycling program is in violation of Howard County Code §16.611 and is subject to a civil penalty for each day that that the violation continues. In addition to a civil penalty, the County may pursue other legal action to enforce State and County law.
