

ETHAN MARCHANT, AIA, LEED AP BD+C

ASSOCIATE

PROJECT ASSIGNMENT: PROJECT MANAGER

Ethan is a registered Architect and a LEED accredited professional, whose experience includes many complex adaptive use projects. Through a mixture of renovations, additions to existing structure, and new construction, he is able to transform existing and historic buildings into beautiful, functional spaces.

He has been involved in all phases of project development from design and conceptual studies through working drawings and construction administration.

He is proficient in BIM software as well as advanced three dimensional rendering programs. He will help the team visualize the design in virtual models, which capture the design of the proposed building at every phase of the project and assist in the production of thorough construction documents and specifications.
