County Council of Howard County, Maryland

2019 Legislative Session

Legislative Day No.

Resolution No. <u>45</u>-2019

Introduced by: The Chairperson at the request of the County Executive

A RESOLUTION approving a Financial Assurance Plan for Howard County's National Pollutant Discharge Elimination System, Municipal Separate Storm Sewer System permit programs, in accordance with Section 4-202.1 of the Environment Article of the Annotated Code of Maryland; and requiring certain copies be sent to the Maryland Department of the Environment.

Introduced and read first time April 1, 2019. By order Lessica Feldmark, Administrator
Read for a second time at a public hearing on Opil 22, 2019.
By order Lesson Feldmark, Administrator
This Resolution was read the third time and was Adopted \(\frac{1}{2} \), Adopted with amendments, Failed, Withdrawn, by the County Council
on <u>May</u> (e, 2019.
Certified By Jessica Feldmark, Administrator
Approved by the County Executive on May 13, 2019.

Calvin Ball, County Executive

NOTE: [[text in brackets]] indicates deletions from existing law; TEXT IN SMALL CAPITALS indicates additions to existing law; Strike-out indicates material deleted by amendment; Underlining indicates material added by amendment

WHEREAS, related to the Watershed Protection and Restoration Fee, Howard County is
required to file a Financial Assurance Plan ("Plan"), approved by the local governing body, with
the Maryland Department of the Environment ("MDE"), in accordance with § 4-202.1 of the
Environment Article of the Annotated Code of Maryland (the "State Law"); and
WHEREAS, the County has worked with MDE over the past serval months to craft a Plan that projects and describes actions and financial resources and costs related to stormwater management in Howard County over the two-year period following the filing date of the Plan; and
WHEREAS , previous Plans have been approved by the passage of Council Resolution No. 92-2016 and Council Resolution No. 185-2015; and
WHEREAS , the State law requires that the County file a Plan with MDE and that the governing body of the County approve the Plan prior to filing with MDE.
NOW, THEREFORE, BE IT RESOLVED by the County Council of Howard County, Maryland, this
AND BE IT FURTHER RESOLVED that a copy of this Resolution and the Plan be sent to the Maryland Department of the Environment, 1800 Washington Boulevard, Baltimore, MD 21230.

Howard County Financial Assurance Plan 2018: Executive Summary

Permit Overview

The National Pollutant Discharge Elimination System (NPDES) Municipal Separate Storm Sewer System (MS4) permit issued to Howard County, hereinafter "the County", on December 18, 2014, mandated that the County implement restoration efforts for 20% of its total impervious surface area that has not already been restored to the maximum extent practicable (MEP), by December 17, 2019. As part of the impervious area accounting and restoration process, the Maryland Department of the Environment (MDE) has allowed for each Phase I MS4 municipality to submit an updated and revised impervious baseline in year 4 of the current permit, which for Howard County is 2018. Countywide, the total County MS4 Impervious Area, or the area under Howard County jurisdiction, is 13,775.7 acres as of 2002, the baseline year. The impervious baseline treated area is 3,733.6 acres and the untreated area is 10,042.0 acres. Applying the 20% factor to the untreated area yields a 20% restoration target of 2,008.4 acres. State law requires that the County approve and file a financial assurance plan (Plan) with MDE that describes actions, revenues, and costs required to meet the 20% restoration requirement. The law also requires that the County Executive certify that a public hearing was held on the Plan and that the local governing body approved the Plan. Because a new County Executive and County Council took office on December 3, 2018, this Plan is draft until such time that the new local governing body can approve the Plan.

Howard County implemented its stormwater utility fee, the Watershed Protection and Restoration Fee (WPRF), on July 1, 2013, as required by State law. Upon implementation of the Fee and the Watershed Protection and Restoration Fund, the County increased existing efforts to plan, design, construct and monitor restoration projects necessary to meet the NPDES MS4 permit's 20% restoration goal. Per MDE guidance, all restoration projects implemented following June 10, 2010 are considered restoration that applies to the County's 20% restoration goal. From July 2010 through July 2018, the County has achieved credits for restoring 1,871.5 acres (18.6%) and has 136.9 acres remaining to treat by December 17, 2019.

Actions Required to Meet Permit

The County will continue to implement the numerous programs required by the MS4 permit. Best management practices (BMPs) will continue to be utilized to complete the restoration work and improve water quality, including stream restoration, outfall stabilization, tree planting, construction of new BMPs, retrofitting existing BMPs, street sweeping, inlet cleaning, and septic system upgrades, pumpouts, and connections to the sanitary sewer system. The County also continues to research and develop the voluminous electronic data necessary to meet the ever-expanding Geodatabase reporting requirements of the MS4 permit.

Total Permit Cost and Fund Sources

The County appreciates the importance of working to meet the restoration requirement of its permit. Utilizing current project cost estimates for restoring impervious acreage, as well as including the acres calculated to-date, the County believes that the 20% restoration requirement of its MS4 permit will cost approximately \$180,999,917 beginning in Fiscal Year (FY) 2011 through FY 2020. Over the next two fiscal years, FY 2019 and FY 2020, the County has programmed more than enough projects to meet the 20% restoration requirement and has budgeted approximately \$49,109,778 to ensure that the requirement is met. These cost estimates include the engineering design, construction, and monitoring costs associated with commencing and completing the implementation of the 20% restoration requirement.

The County will use the following revenue sources for FY 2019 and FY 2020 in funding the costs of the MS4 permit over the next two fiscal years:

Watershed Protection and Restoration Fee- The County currently collects approximately \$10.8 million from the Watershed Protection and Restoration Fee. This amount will decrease steadily over the next year, as the Fee for commercial properties continues to decline, as specified in Council Resolution 37-2016. The County will also utilize this Fund to absorb a portion of the operating costs in administering stormwater restoration projects and to provide debt service for General Obligation or Storm Water Bonds issued to fund the stormwater restoration projects.

Grants- The County typically receives funding from various State and Federal grant programs to conduct stormwater restoration work. There is also the potential to work with private entities in conducting stormwater restoration work.

Stormwater Bonds – The County will issue stormwater bonds to fund necessary stormwater restoration projects required by the MS4 permit

General Fund- The County will utilize its General Fund to absorb a portion of the operating costs in administering stormwater restoration projects.

General Obligation Bonds- The County will issue General Obligation Bonds, if necessary, to fund necessary stormwater restoration projects required by the MS4 permit.

Future Considerations

The Plan describes projected actions, revenues, and costs to meet stormwater management requirements based on the current policy and regulatory environment established by MDE. As the County moves forward in its program, it continues to gain a better understanding of the costs associated with completing the necessary stormwater restoration work. In addition, the County expects that several factors to be determined at the State level will influence the costs of meeting the MS4 permit:

Revised Accounting for Stormwater Wasteload Allocations and Impervious Acres Treated - The Chesapeake Bay Program (CBP) recently finalized the development of the Phase 6 version of the Chesapeake Bay Watershed Model (P6 Model). Changes in pollutant load modeling have a direct impact on impervious accounting since the impervious equivalencies are based on pollutant load reductions. The changes in P6 loading and reduction rates has prompted the development of draft P6 impervious acre equivalencies. It is the County's understanding that new equivalencies will be included in the forthcoming updates to MDE's Accounting for Stormwater Wasteload Allocations and Impervious Acres Treated guidance in 2019. Although, draft P6 impervious acre equivalencies are not finalized or published at this time, it is important for the County's allocation of resources and near-term budgeting to prepare for potential changes to the crediting.

Nutrient Trading Program- MDE and the Maryland Department of Agriculture dedicated considerable resources to a nutrient trading program that allows nutrient trades that will help Maryland jurisdictions meet their 20% restoration requirement in a cost-effective manner. The option of including nutrient trading to meet the 20% restoration requirement is not included in the County's Plan at this time, but may be included in the future, if necessary.

Summary

The Plan presented is a projected spending plan that will assist the County in meeting its MS4 permit restoration requirement.
