**Subject:** Surcharge increase on developers

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Please increase the surcharge on developers to help fund school renovations and to fund new school construction. I work in the overcrowded Hollifield Station Elementary School. We have 5 portables now. While we are doing our best, it is not a great solution to the overcrowding caused by new construction. Our children and teachers have to go outside in all kinds of weather to get to the portables. The teachers are isolated from the other staff, which can only negatively impact co-teaching and team cohesiveness. Please consider the needs of all the neighborhood children to a healthy environment for learning.

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear Howard County Council,

Over the past several years I have become disheartened with some decisions made by my local Howard County government, particularly on terms of budget and fees. I am disgusted when I learn that HCPSS doesn't have adequate funds for updating schools, adjusting start times to better meet teens' biological needs, and even improvement projects like repaving Stephens Road in North Laurel. I am aware that our county charges developers less than neighboring counties when they build homes here (homes for which we do not have adequate infrastructure and schools to support). This is the 3rd richest county in the US and I hear "we don't have enough money for that" far too often.

Please support CB 42.

Respectfully,  
Mendy Hunter

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

I am a Columbia, Md resident. I would like to see that when doing building new housing developments that we take in to account school developments for those areas so as not to assist in over crowded areas, disrupting the community. We are suppose to have funds set in budgets for builders so as to acquire the proper funds to build schools before housing projects even get started. This disruption is very disturbing for our community. However that being said, I support the surcharge for construction. If bidders come in they must include school renovations and building of new schools in order to build in Howard county. I am also against busing in new students, when we can't even house the ones we have yet. Lets work on our community first before considering helping others. Its asking a lot of people when they are already trying to adjust to new circumstances, and your not even letting people know.. I find this disturbing as well. I am not against the issues, but I believe they should bring this up to the schools, and the community, and the one coming in. Its a big expense for us, when we need more money now just to build schools. Only surrounding areas should be bused in. Going outside of the county is going to cause a bigger charge on our pockets and not on the other community. I say help the teachers and schools in that area, but doing fund raisers and let that county work on that community to better itself. Throwing everything our way again is not fair.

Katy Do  
Concerned Columbia resident.

9/10/2019

Dear County Council,

I am writing to request that you vote to approve the school facilities surcharge for school construction. As you are aware, HCPSS is currently experiencing severe overcrowding in many of our schools. It will be difficult to keep up with the adequate educational costs without increasing this facilities surcharge. I believe that this should be a TOP PRIORITY and I hope that you will strongly consider voting to approve this measure. Additional funds that could be obtained through this measure could help provide needed funding to help address over-crowding, including funds for development of the Talbott Springs Elementary School Replacement, High School 13, Hammond High and Centennial High renovations and potential new elementary schools. As a parent of two young children at St. John's Lane Elementary school, I can absolutely attest to the difficulty students and teachers are currently coping with due to over-capacity. For example, our current art teacher, Mrs. Moon, no longer has an art class! Instead she must use a portable cart to shuttle her art supplies from class to class for student art projects. This is because our art class (a "portable") had to be allocated for a classroom, since the demand for an additional classroom could not otherwise be met.

I hope you have paid attention to the outrage among parents and families throughout Howard County as over 7,000 students face the possibility of moving schools – in part because of OVER DEVELOPMENT and POOR PLANNING without requiring developers to pay their due. Parents and families are watching closely, and we will remember those who do not vote in favor of this bill.

Sincerely,

Heather Ann Dalwadi

**Subject:** Written Testimony for CB42-2019

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

To whom it may concern,

As a resident and parent in Howard County I feel increasing developer fees is long overdue. Our county is beyond the point of being at capacity and now struggles daily with over capacity. For example nearly *half* of our elementary schools in this county are over 100% capacity. *Over* 100%. That is completely unacceptable. This is due in large part to the rapid population increase because of the new developments. While it is not a bad thing to have a new development with new people and ideas and avenues of revenue and employment, part of the planning for this new development *must* include the feasibility of the addition of these new families into the community. We need to be able to properly and safely serve all residents of this amazing county. As we build and grow more developments we need to consider the costs of creating more classroom space and even entire new schools to accommodate more families. Increasing the developer fees will help to contribute towards the infrastructure costs required to establish this community. At this point we are so long overdue for the money we need to keep up with the population growth that children currently in schools are suffering. In the past several years our children have been subjected to necessary redistricting just to handle the burdens of development and population spikes. As a parent of two howard county public school children it both breaks my heart and angers me that as a resident of a county that touts its school system, our past council members have been so hesitant to encourage new members of the county to contribute to the added cost of a larger population.

In addition to adequate school concerns, as a resident of Ellicott City I am also deeply aware of the effects of over development on our environment. It cannot be ignored that the increase in development has contributed, at least in part, to two major and deadly flood events here in Howard County. In order to protect our community we need to consider the costs of creating better drainage and planning for how to react and adapt to the changing landscape as more development continues. As this costs money, it seems only fair that the developers of these new communities provide some funding for this.

I urge you to pass this bill and start making a more balanced fee for developers. Thank you for your time.

Sincerely,  
Sara Britt

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear Council,

Please please please please please support and pass CB42 to raise impact fees. It is long overdue that developers pay their fair share for schools and infrastructure for the homes they build and from which they profit. Please do not give into the doom and gloom hype they will propagate; development still exists in other counties with higher fees similar to this level. Please, don't balk. We must begin to make up for years of underfunded construction, NOW. The state delegation has finally handed us this opportunity and we must act on it!

Sincerely,  
Brian Vivrette

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear Council Members,

I support raising the school facilities surcharge for school construction on developers. This a priority for me as my children used to have a much better teacher:student ratio and are now left with much less support and individual attention which in my opinion is what made the Howard County school system a success and helped many students achieve excellence. Foreign language pilot has already been removed from my children's elementary school curriculum, please don't allow the school system to be eroded further due to overcrowding and over-zealous development.

Thank you,  
Sarah G. Byndloss  
Howard County Resident

Howard County Council

RE: CB 42-2019

Via EMAIL

Council Members:

I am a 30-year resident of Howard County and a business owner/partner in the building/development business. I am writing to oppose CB 42-2019.

One of the necessities of operating a business is the transparency and predictability of good governance. This bill represents neither. There has not been any data or explanation to the arrival of the \$6.80 tax value, other than simply stating it is what is needed to build new schools, and it is better than the \$18 - \$25 value that some council members want.

There is no grandfathering provision in the bill in its current form. There are many contracts that have been committed to based on the current regulations and tax structure in place. While there is always the understanding that they may change, Howard County has made it a practice to allow for a grandfathering period in fairness to the existing contractual obligations and predictability for businesses. Having followed the discussions and debates from the State enabling legislation for this tax increase, it seemed that the legislators intended for a grandfathering provision as well.

Howard County has both APFO and an allocation process to control growth and plan for the infrastructure and facility needs. While the County has consistently built homes in a number that lags the allowable annual allocations, the County has not added enough school capacity to keep up.

While it is easy for the public to point to new development as the culprit of overcrowded schools, new development has only been responsible for around 40% of the new student growth over the past few years and is projected to be considerably less than that in 2019 and beyond. To task new development with the full costs of solving the problem is not fair nor justified. An increase and reallocation of the existing transfer tax that affects ALL sales evenly would balance the cost fairly.

Finally, the proposed tax increase will have a negative fiscal impact, is severely regressive, and poorly timed to hit at a time when the County is undergoing an affordable housing crisis. Not only would it obviously increase the cost of new housing by over \$13 k for a 2500 sf townhouse

and \$21 k for a 4000 sf single family home, but without an adequate supply of new housing to meet the incoming demand, the price of the existing housing will escalate rapidly and price out young families and those of anything but the highest income brackets.

Thank you for this opportunity to present my testimony.

Sincerely,

Russ Dickens

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear County Council Members,

I am in total support of passing CD42 to support more funding for our Howard County Public Schools construction projects. Families move to Howard County for the schools, yet our schools are in desperate need of updates, renovations, additions, and new school buildings to support the growing population. It is about time the developers help support our schools by increasing the school facilities surcharge they pay. If surrounding counties can do it, so can Howard County!

Sincerely,  
Dawne Royo

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Hi, Council Members:

I am writing in supportive of CB42-2019 because our school system is in desperate need for additional funding. Some school programs at Centennial Lane ES that relate to our kids are already being trimmed, such as the It's Academic club during school recess and the Math Olympiad learning. I don't want to see the threat of cutting important school programs occurring again in the future. Education for our kids are very important to us.

We can't continue to allow developers build in this county if they don't provide enough financial contribution to build the school infrastructure to support more students.

So please Vote Yes for CB42-2019. Thank you!

Sheen Yi  
District 1 Resident

I am a responsible and environmentally concerned land developer and am very concerned about both the bills and strongly opposed to this bill..

I am aware that Main Street in Ellicott City has many people very concerned but a blind and blanket attack on development is a negative regressive step.

There are already very heavy plan submission fees and impact fees and financially destroying the developers is not the way to get smart development.

I will be out of the country for next two weeks and not in a position to personally attend hearings.

Thanks.

Good afternoon.

I am a resident in the Glenmar subdivision off Elko Drive, and I am in favor of both CB 42 and CB 38.

The county needs to get those developer impact fees so that when my kids reach middle school and high school, they are able to get their education in brick buildings with enough classrooms, desks, and resources.

Right now, due to the actions taken over the last many years, there is neither sufficient money nor land available for more school facilities because the county council previously allowed development without concessions or impact fees. How many more students will be in the system, living in the new housing at 103/100 (apartment/condo complex), Montgomery and Brightfield (townhouses), etc? But no land was set aside to build HS14, and that will now require eminent domain actions.

Please make sure these trends have come to an end. Better late than never.

Thank you.

-Steven Cooperstein

**Subject:** Testimony Regarding Legislation Raising the School Facilities Surcharge on Developers

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

To Whom It May Concern:

I strongly support this legislation to raise the School Facilities Surcharge on developers in Howard County. I think it's extremely clear that developers are not contributing their fair share to alleviate the significant additional burden being placed on public facilities by new development. There has been and continues to be a huge amount of new development in Howard County and in order to maintain it as an enjoyable place to live, we need to start ensuring that facilities keep pace with demands placed on them by development. In particular, there is not enough money to build schools to adequately support the school-aged children in a given area; this is becoming a huge problem resulting in frequent redistricting in Howard County that disrupts children's social support systems, extracurricular activities, and most importantly, their academic progress and opportunities. I am deeply concerned about the impact redistricting and overcrowding is having on the children growing up in Howard County, and the main cause behind this issue is the development of new areas without due consideration for where and how to build new schools and infrastructure. I think this change to require developers to pay a reasonable contribution to sustain these necessary public resources is long overdue. This area is currently one of the most desirable places to develop in the country, but it won't stay that way unless we prioritize maintaining and enhancing our public facilities in response to the influx of development. I strongly support raising the school facilities surcharge on developers, and would support other similar measures along these lines. Thanks for your time.

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear Councilman Yungmann and Ms. Knight,

I'm trying to find out more about CB42-2019. I understand why the council wants to increase the school facilities surcharge, but to go from \$1.35 to \$6.80 for everyone, at once, is distressing. I understand charging this to builders that develop communities etc., but if you are an individual building a house to live in as your primary residence, this will make building financially insurmountable for many, if not all.

If this bill passes, will this go into effect July 1, 2020?

If the bill passes and is effective, July 1, 2020, is there any possible way to get an exception due to wet season perc testing restrictions for when a build permit can be applied or for a senior citizen who wants to build a house (not a senior living facility)?

Thanks in advance and I hope to hear from you soon!

Cordially,

Charlene Depry

Dear County Council members,  
I am writing to encourage your support of CB 38 and CB 42.

We are in a climate crisis and the reality is we need to declare a climate emergency. CB 38 is a microcosm of the bigger issue we have in this county and worldwide. This bill is a powerful statement to illustrate the importance of dealing with the existential threat that is upon us.

CB 42 is long past due. I would encourage 8 dollars per square foot.

Thank you for all you do.

Sincerely,  
Pat Hersey

Dear Howard County Council Members,

Please exercise the power of your votes on CB42 to ensure that developers start paying their fair share of the cost of educating our expanding population. Out tax dollars should be invested in equitable, high quality education (including adequate facilities) for all county residents, rather than in subsidizing developers' profits.

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear Sir/Madam

We are for a modified CB-42. Some of the areas in Howard County don't have good drainage system which is causing flooding to many of the houses specially in their basement. So we feel increasing education surcharge on developers may be a good idea but the very fact of allowing more development in some parts of the Howard County is a bad idea for environment and existing homes. We would request two amendments to the Bill

1. This should be applicable only where development be considered environmentally safe
2. There should also be surcharge to the developers for improving drainage system which we don't have in many places in Howard County and causing basement flooding ( may be another Bill ).

**Subject:** Statement in support of CB 42-2019

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

I am writing in strong support of CB42, to increase the school facilities surcharge that developers pay for new residential construction in the County. The Act proposes to raise the school facilities surcharge fee from the current rate of \$1.32/sq. ft. to \$6.80/sq. ft. In my opinion, the current rate of \$1.32 is woefully inadequate, especially given the rapid growth in the County and the great challenges that the County faces in providing enough quality facilities to educate our children at a time of increasing yearly school enrollment. It is beyond time for developers to pay their fair share to ensure that there are enough funds to build and/or renovate the schools for which so many residents move to Howard County in the first place. I have heard press reports that the developer's trade association, the Maryland Building Industry Association, has called the state law that allows the County Council to raise the surcharge "unconscionable." In reality, CB-42 puts Howard County more in line with what most other Md. Counties charge. In my opinion what is unconscionable is that the developers have been able to get away so long with being charged such an low amount of money to ensure there are adequate educational facilities for the households that they have created.

I would also urge the Council to not add amendments to the bill that water it down or give excessive exemptions. The bill already provides relief and exemptions for senior and affordable housing units.

Sincerely,

Paul A. Scott, PhD

District 4

**Subject:** Support for CB-42-2019

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear County Council,

I am writing to express my support for CB-42-2019 as a means to raise the funds that our schools so desperately need. As a Howard County resident for the past seventeen years, this increase in fees for developers is long overdue.

With that in mind, it would be an absolute travesty to use these funds for the anticipated tripling of the transportation budget for HCPSS as stated in Dr. Martirano's proposal for redistricting. Rather, those funds should be used to fast track the building of HS #13, replace the old Talbot Springs ES, renovate and build the needed addition at Hammond HS and provide needed staff positions, materials and programs to help underperforming schools and students.

I strongly oppose CR-112 and am fully aware of which council members introduced and co-sponsored it. Howard County residents are watching you closely as we continue our momentum to vote out those who are trying to institute their leftist ideals.

Regards,

Jennifer Lynott

I support CB42-2019, which would raise the School Facilities Surcharge on new home construction in Howard County.

No school in Howard County should be overcapacity, and no school should have decades of deferred maintenance impacting our children's ability to learn. Our kids deserve an educational environment where they can thrive.

Our current school-aged kids are paying for past bad decisions. Let's make the right choice for the future students in Howard County!

Jamie Humphreys

**Subject:** Raise surcharge fee

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

*Dear Members of the County Council:*

*Developers find it profitable to build homes in Howard County because of its school system. For 15 years, developers have not only profited from building homes, they have also profited from low school surcharge fees.*

*School surcharge fees are used to partially cover the cost of new school construction. In Howard County this fee was set at an arbitrary value of \$1.00 per square foot and pegged to inflation.*

*The fee in 2019 is \$1.32 per square foot- a mere 1.7% increase since 2004. According to the 2018 Department of Legislative Services Report the fee in Montgomery County is on average \$30,575 per home, which represents a 10% increase since 2004.*

*In the last 15 years, the County has approved a minimum of 24,000 new homes. At this rate, the county has forgone nearly \$530 million in school surcharge fees. The three-year average school surcharge fee in 2017 was less than \$5,500, while the cost of building new schools could be a minimum of \$60,000 per new student.*

*While the proposed fee of \$6.80 is a step in the right direction, I think the fee can be higher. I urge you to raise the fee to \$8 per square foot. I also urge you to provide no exemptions to any developer. No grandfathering of projects.*

*Raise the fee now so our school system can get the funding it needs to build schools and students can find the resources they need.*

*Thank you to Councilpersons Christiana Mercer-Rigby and Deb Jung for introducing this legislation.*

Jabin Janoo

**Subject:** Support for CB42

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear Council Members:

My name is Abby Bolisay and my children are students at Manor Woods Elementary. I am writing to urge the Council to approve CB42-2019.

Due to the lack of adequate funding for school infrastructure, we don't have enough paraeducators to fully support the teachers and students; not enough human resource for kids with special needs. Not to mention it's crowded at school, air-conditioning is not working for at least half of the school. One hour Technology class is much needed, and we will continuously need funding for GT programs and music.

This week's announcement of delays to much-needed school capital projects underscores the urgency of increasing the school surcharge fees on new residential construction to be closer to the actual cost of adding a new student seat to a brick and mortar classroom. CB42 does exactly that.

Please support CB42. Our schools cannot wait!!

Sincerely,

Abby Bolisay

District 9

**To:** CouncilMail  
**Subject:** Testimony on CB42: Raising Developer Surcharge Fee

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Hello Howard County Council,

Please vote YES to increase developer surcharge fees. While raising the fee to \$6.80/sq ft of new residential development is good, raising the fee to \$8.00/sq ft is better and will get us closer to meeting the cost of providing a new seat in Howard County's notoriously overcrowded schools. For years developers have built homes that bring families with schoolchildren into our county without defraying the public cost of providing seats in the schools for those children. Because of the school overcrowding that this overdevelopment brings, the public suffers from frequent redistricting of schools, plus continual postponement of school capital projects for lack of adequate funding. CB42 will help in that effort.

Please vote to increase the developer surcharge fees (CB42) to \$8.00/sq ft and help preserve the reputation of Howard County's amazing school system.

Respectfully,

Caroline Bodziak  
3133 Hearthstone Rd

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

I am writing to support CB 42 legislation regarding the raise in developer fees to support education in Howard County. An increase in the School Facility Surcharge is needed to bring more funding to our over crowded school system. Thank you!

Denise Lindsay

*Dear Members of the County Council:*

*Developers find it profitable to build homes in Howard County because of its school system. For 15 years, developers have not only profited from building homes, they have also profited from low school surcharge fees.*

*School surcharge fees are used to partially cover the cost of new school construction. In Howard County this fee was set at an arbitrary value of \$1.00 per square foot and pegged to inflation.*

*The fee in 2019 is \$1.32 per square foot- a mere 1.7% increase since 2004. According to the 2018 Department of Legislative Services Report the fee in Montgomery County is on average \$30,575 per home, which represents a 10% increase since 2004.*

*In the last 15 years, the County has approved a minimum of 24,000 new homes. At this rate, the county has forgone nearly \$530 million in school surcharge fees. The three-year average school surcharge fee in 2017 was less than \$5,500, while the cost of building new schools could be a minimum of \$60,000 per new student.*

*While the proposed fee of \$6.80 is a step in the right direction, I think the fee can be higher. I urge you to raise the fee to \$8 per square foot. I also urge you to provide no exemptions to any developer. No grandfathering of projects.*

*Raise the fee now so our school system can get the funding it needs to build schools and students can find the resources they need.*

*Thank you to Councilpersons Christiana Mercer-Rigby and Deb Jung for introducing the legislation.*

*Erin Roberts, Howard County resident*

**Subject:** CB42 feedback to County Council

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

*Dear Members of the County Council:*

*I am a resident of Howard County and have been actively engaged in local Democratic politics and have supported your election campaigns. But I'm finding it difficult to support you while the County Council and County Executive are supporting Developer's efforts not to raise the impact fees.*

*We are aware of how much Developers pay neighboring counties and disappointed that the County Council who are supposed to look after the best interest of howard county residents are cowering to Developer's demands.*

*As you know, HoCo has been a desirable place to live for the last few decades but that prestige is slowly fading away and in jeopardy because of overcrowding of schools and unpredictability of school redistricting every two years. Thus, I'm asking you to raise the school impact fee from where it is today to a minimum of \$8 per square foot for new homes being built so that the Board of Education gets the proper funding to expand and build schools.*

*I also urge you to provide no exemptions to any developer. No grandfathering of projects.*

*Raise the fee now so our school system can get the funding it needs to build schools and students can find the resources they need.*

*Thank you to Councilpersons Christiana Mercer-Rigby and Deb Jung for introducing this legislation.*

Les Chasen  
District 5

Dear Council Members:

I fully support CB 42 to increase development fees. I would be ok with carve outs for individuals building a single family home on a plot of land they personally own. However developers developing multiple (2 or more) properties should have no exceptions.

It is no secret that we have experienced significant growth in population due to new developments without a commensurate increase in school development. We need to slow down the amount of new development until we have more school capacity.

Sincerely

Les Chasen

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

It is common sense that the School Facilities Surcharge should be increased. Our schools would not be over crowded or in such bad disrepair (Hammond High School, Thunder Hill Elementary School) if developpers paid what they should.

It is high time the County Council does what is desperately needed and increases the surcharge.

**Attachments:** School Surcharge Fee Petition Signatures.pdf; School Surcharge Fee Petition Signature Comments.pdf

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Members of the County Council:

I am encouraged by the proposal to raise the county's school surcharge fees to \$6.80 per square foot. Developers find it profitable to build homes in Howard County because of its school system. For 15 years, developers have not only profited from building homes, they have also profited from low school surcharge fees.

School surcharge fees are used to partially cover the cost of new school construction. In Howard County this fee was set at an arbitrary value of \$1.00 per square foot and pegged to inflation.

The fee in 2019 is \$1.32 per square foot- a mere 1.7% increase since 2004. According to the 2018 Department of Legislative Services Report the fee in Montgomery County is anywhere from \$23,062 in so-called "yellow" and "green" zones to \$38,087 in "red" zones - an average of \$30,575 per home, which represents a 10% increase since 2004.

While I think the initially proposed fee goes in the right direction, I think the Developers can afford to pay more. This is why I think the fee should be \$8.0 per square foot.

In the last 15 years, the County has approved a minimum of 24,000 new homes. At this rate, the county has forgone nearly \$530 million in school surcharge fees. This does not include the time value of money or the intangible costs due to stress on infrastructure from deferred maintenance, increased class sizes, interest paid on

bonds, etc. While the cost of building new schools could be a minimum of \$60,000 per new student.

This issue is important to Howard County residents. This is why nearly 2400 of them signed a petition to raise the fees to \$8. The list of signatories and their comments is attached.

Opponents of school impact fees have been spreading a lot disinformation.

Property values will not go up if surcharge fees are raised. Property values increase in the county because of the quality of living- mainly its schools. If the quality of life and schools deteriorates property values will tank and those with means – including developers will move to greener pastures. Those left holding the bag won't be able to support the costs to maintain the infrastructure. So if the intent is to let property prices tank, keep the surcharge fees low.

Affordability will not be affected. Howard County has squandered every opportunity to get affordable housing. The exemptions in Maple Lawn, the zero affordable housing in Down-Town Columbia, the fees-in-lieu, which are calculated based on another arbitrary fee have kept housing out-of-reach for many. This is another false argument.

It will not reduce the supply of homes and the county's revenue. County and state leaders need to disabuse themselves of the notion that homes are a source of net revenue. Each home has associated costs: schools, roads, police, fire, hospital, water, sewer, environmental, bike paths, public transportation.

There is an average of 0.5 kids per home in Howard County. It costs \$15,000 per student to run the public school system. At the rate of 0.5 kids per home, it is unrealistic to assume each home contributes \$7,500 for schools alone in addition to roads, police, fire, hospital, water, sewer, the environment, bike paths, public transportation and so forth.

Let's end the practice of corporate welfare by local jurisdictions and get back to managing the taxpayers' dollars responsibly. The welfare of the county's most effective economic engine is at stake.

So please raise the fee to \$8.0 per square foot and absolutely no exemptions and grandfathering of projects.

Thank you to sponsors of the legislation Councilpersons Mercer-Rigby and Jung, and the co-sponsors, Councilpersons Walsh and Jones.

Best Regards,

Hiruy.

min kyung paek	elkridge, MD	2018-12-01	"I don't want my kid to go to school w/ overcrowding students because keep building houses in Howard County even no land to build the school"
Abeba Aberham	Ellicott City, MD	2018-12-01	"My family and I moved to Howard County 11 years ago because of the positive reputation the school system has. My family and I are experiencing the impact of overdevelopment without proper planning. I have noticed the increase in portables at all levels of schools my children attend (Elementary, Middle and High Schools). Portables pose safety concerns especially at the elementary level. Overdevelopment is impacting traffic and our daily commute. We need to hold our elected officials accountable to make certain that they consider the needs of our students and the community and not just the interests of the profit driven developers."
Charles Goedeke	Laurel, MD	2018-12-01	"This situation is seriously unfair, and needs to end!"
Terri Stengel	Savage, MD	2018-12-01	"I'm signing this petition because it's the right thing to do for our community!"
Marcia Jones	Elkridge, MD	2018-12-01	"Developers need to pay more to help with the overcrowding of Howard County Schools!"
Wayne Davis	Columbia, MD	2018-12-01	"Developers need to pay their fair share to support the infrastructure needed for new developments."
Katie Schneider	Laurel, MD	2018-12-01	"Our kids deserve this. Even with tax payers picking up the rest of the bill, we still fall short of what our educators and students need and deserve. The county has gone out of control by allowing developers to keep building without supporting the infrastructure of the community. Enough is enough."

Jason Schiller	Jessup, MD	2019-06-04	"Developers need to contribute funds towards the schools that they keep filling."

<b>Name</b>	<b>Location</b>	<b>Date</b>	<b>Comment</b>
Cathy Datz	Lisbon, MD	2019-06-04	"My son needs the same quality education my other children have received for the last 22 years."
John Gilbert	Clarksville, MD	2019-06-04	"Developers in Howard County have not paid their fair share of the cost to the public infrastructure."
Candice Smithson	Clarksville, MD	2019-06-05	"My son would struggle without his reading specialist."
Elif Tasci	Oakton, VA	2019-06-05	"I'm signing because I don't agree with HCPSS decision"
Cheryl McPherson	Columbia, US	2019-06-05	"My kids need the support staff, without them he will fail and it will all be devastating."
Katy Iazzari	Laurel, MD	2019-06-05	"Overcrowded school and overextended public services including roads are causing problems throughout the county. Developers should be responsible for alleviating this since they are pocketing \$\$ \$ for buildings here."
Erin Alberts	Laurel, MD	2019-06-05	"I care about all children and their educations"
Albert DeRemigis	Laurel, MD	2019-06-10	"Schools can't handle additional students."
Elizabeth Humes	Laurel, MD	2019-06-11	"I have lived here for 29 years and I am tired of seeing the standard of living go down in my neighborhood (we can no longer safely ride bikes or walk on the roads - our old neighborhoods have no sidewalks and will not get them but increased traffic keep happening as well as over crowded schools with more pressure on the teachers and constant redistricting. Someones interest\$ are being looked out for but is not the current residents. Our taxes go up with nothing to show for bit more traffic and overcrowding of resources. STOP it!!! Start thinking about the future and plan accordingly and stop pocketing kick backs."
Jennifer Glover	Sykesville, MD	2019-08-23	"Developers are dictating what they "think" our community and kids need. It's time for them to pay up and give our kids what they deserve. You want to build more houses and keep developing our green spaces? Give us the money our county deserves to build the proper infrastructure before you keep building and profiting from our community. It's a shame that making money is more important than ensuring that our kids have the proper learning environment and support. Our kids are paying the price for your greed. Enough is enough!"
Kathy McClellan	Ellicott City, MD	2019-08-24	"Our schools are already popping at the seams and new neighborhoods are still being built...it's absurd"

# change.org

Recipient: Howard County Council and County Executive, Liz Walsh, Opel Jones, David Yungmann, Calvin Ball, Christiana Mercer Rigby, Deb Jung

Letter: Greetings,

Charge Developers Market Rate School Impact Fees; Stop Subsidizing Their Profits.

# Signatures

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear County Council and Dr. Ball,

I am a resident in Highland, MD, near Clarksville area. I am writing this email to strongly support the CB42 legislation.

We are currently in the middle of this biggest school redistricting mess, which affects every county resident, and especially every family with school age children. I have two children in ES and MS. **While the current round of school redistricting does not directly affect us, the issue of school funding insufficiency has really been brought up to the forefront.** No matter how the decision on school redistricting is, I think our county council and county executive have to fight every battle to provide HCPSS with more fund.

The redistricting plan, by shuffling kids around, masks **the real problem that our county simply need to invest more money into HCPSS so that: 1) schools are not over-crowded, 2) equality in education resources can be achieved in all schools, and 3) more resources and staff can be provided for especially for high FARM schools so every kids can thrive.**

Raising builder fee from \$1.32/sq ft to \$6.80/sq ft will:

1. Be good step toward funding school infrastructure.
2. Will discourage more residential development which causes school overcrowding for the first place (which can not and should not be solved just by bussing kids around)

**HCPSS is the key attraction for our county. People move here mostly for HCPSS, as our family does. The day that HCPSS take a turn to deteriorate, it will be the day for the county to fail in every other aspect.**

County council, and Dr. Ball, I hope you will hear us on THIS! And please hear us on our concerns with anything related to HCPSS.

Sincerely,

Jiehua Li, PhD

**Subject:** CB42 School Surcharge Fees

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

*Dear Members of the County Council:*

*Developers find it p*

*rofitable to build homes in Howard County because of its school system. For 15 years, developers have not only profited from building homes, they have also profited from low school surcharge fees.*

*School surcharge fees are used to partially cover the cost of new school construction. In Howard County this fee was set at an arbitrary value of \$1.00 per square foot and pegged to inflation.*

*The fee in 2019 is \$1.32 per square foot- a mere 1.7% increase since 2004. According to the 2018 Department of Legislative Services Report the fee in Montgomery County is on average \$30,575 per home, which represents a 10% increase since 2004.*

*In the last 15 years, the County has approved a minimum of 24,000 new homes. At this rate, the county has forgone nearly \$530 million in school surcharge fees. The three-year average school surcharge fee in 2017 was less than \$5,500, while the cost*

*of building new schools could be a minimum of \$60,000 per new student.*

*While the proposed fee of \$6.80 is a step in the right direction, I think the fee can be higher. I urge you to raise the fee to \$8 per square foot. I also urge you to provide no exemptions to any developer. No grandfathering of projects.*

*Raise the fee now so our school system can get the funding it needs to build schools and students can find the resources they need.*

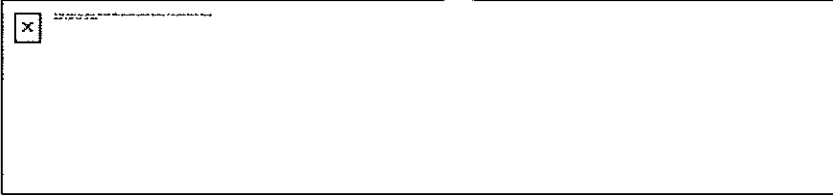

*Thank you to Councilpersons Christiana Mercer-Rigby and Deb Jung for introducing this legislation.*

Regards,  
Alisa Niefeld-Batiz

Dear Council Members,

I am writing asking for you to support CB42-2019. This bill is long overdue. This bill will help provide some of the financial resources we desperately need to build more schools. Due to overdevelopment without adequate infrastructure the schools in the eastern portion of the county are severely overcrowded. I have heard estimates that the county is gaining approximately 1,000 new students a school year. We do not have enough seats in schools to accommodate this kind of growth. We need to be building more schools and working to get every child in a seat inside a building- not in a relocatable classroom. This bill will help us start catching up in providing whatever student in Howard County both needs and deserves.

Sincerely,

Angela Katenkamp Shiplet  
Elkridge

**Subject:** SUPPORT for Council Bill 42

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear Council members:

My name is Marybeth Steil, I live with my family on South Wind Circle in the River Hill section of Columbia. I live in District #4.

I am writing to voice my **support for Council Bill CB42** – to significantly increase fees to developers in Howard County.

In case you haven't heard, many folks in our community are up in arms about the proposed schools redistricting plan here in Howard County.

Now, whether you are for the Redistricting, or against it, it's clear that what we can agree on is that the current fee structures have allowed Developers to run amok -- resulting in the serious shortchanging of our infrastructure here in Howard County. It is unfair for current residents to continue to have to pick up the slack for future residents through this "hidden subsidy" for new developments.

The Howard County Schools Operating Budget Review Committee (OBRC) FY 2018 strategic report identified projected structural deficits in our schools budget by over \$50 million dollars and deferred maintenance exceeding \$500 million. This, coupled with growth projections and the need to expand capacity in our schools, represent a crisis that may have been decades in the making but is now staring us square in the face. Fact: the Howard County Council -- you -- have continually underfunded the HCPSS budget. The County clearly needs more revenues to keep up with growth and continue to maintain our exceptional way of life here in the county.

Howard County can NOT keep kicking the can down the road. If you look at the aging infrastructure, and the timeline of how Howard County developed, you can see why we have a lot of aging and crumbling schools. We don't have the money to build infrastructure to support diversified housing in the areas that can support it (water and sewer) and where the schools have the capacity. Maintenance takes money, never mind the improvements necessary to meet the challenges of educating tomorrow's workforce ready to meet global challenges.

We are at a breaking point. The FARMS students shuffling proposed by Dr. Martirano is but a "canary in the coal mine" - our schools need money. Some schools and student populations need more than others, but it simply takes more resources to operate and maintain a school system that continues to draw the best and brightest to Howard County. Good schools don't come cheap. Nice housing doesn't either. Charge the developers what it will take to keep up with infrastructure needs.

Thank you.

Marybeth Steil  
6448 South Wind Circle  
Columbia, MD

**To:** CouncilMail  
**Subject:** SUPPORT FOR CR-42!

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear Council Members,

I am writing to voice my support for the passage of CB-42 to increase developer fees and increase the school facilities surcharge. As evidenced by the announcement last week to delay much needed school capital projects, including the additions to Hammond High School and the rebuilding of Talbot Springs Elementary School, the need to increase the school facilities surcharge is long overdue. Howard County should stop letting developers off so easy and should have fees more equivalent to those in surrounding jurisdictions.

Please do what is right for our students and our county by passing this bill and make developers pay their part!

**From:** Joni Nuetzel <joni.nuetzel@gmail.com>  
**Sent:** Sunday, September 15, 2019 2:46 PM  
**To:** CouncilMail  
**Subject:** Support of CB42

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear Howard County Council Members,

My name is Joni Nuetzel and I have had children attending the Howard county public school system for the last 13 years.

Due the county council not fully funded the operating budget of the school system, I have witnessed an increase in class sizes that have resulted in decreased individual attention to the student by the teacher, increase portable use in elementary, middle, and high school campuses, and budgets cuts that have resulted in loss of para educators and decrease in technology class, and elimination of world language programs at title 1 schools, just to name a few losses to HCPSS, a once outstanding public school system.

This week's announcement of delays to much needed school capital projects underscores the urgency of increasing the school surcharge fees on new residential construction to be closer to the actual cost of adding a new student seat to brick and mortar classrooms. CB42 does exactly that.

Please support CB42, our students can not wait!!

Thank you,

Joni Nuetzel  
District 1

Christine Gorschboth

9/15/2019

Subject: Support for CB42

Dear Council Members:

My name is Christine Gorschboth and my children are students at Howard High and Elkridge Landing Middle. I am writing to urge the Council to approve CB42-2019.

Due to the lack of adequate funding for school infrastructure, Howard High is severely overcrowded with the worst school overcrowding in the county. The hallways are packed so my daughter sometimes chooses to change classes outside. Despite the crowded hallways, she is very successful there and loves her school. When homes are built, consideration must be given to the greater school capacity requirements and other infrastructure needs resulting from increased population. If there is no plan or funding for infrastructure and schools, the home building should stop. The severe overcrowding should have never gotten to this point, and it is disturbing that building continues without adequate school sites or funds for the needed additions or new schools. This bill is long overdue as a way to support increased population and the needed schools.

This week's announcement of delays to much-needed school capital projects, particularly at Talbott Springs Elem (where my daughter attended kindergarten) and Hammond High (from where I graduated), underscores the urgency of increasing the school surcharge fees on new residential construction to be closer to the actual cost of adding a new student seat to a brick and mortar classroom. CB42 does that.

Please support CB42, our schools have already waited too long.

Sincerely,  
Christine Gorschboth  
Council District #2

**To:** CouncilMail  
**Subject:** CB42 - Please Approve

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear Howard County Council,

I am writing in full support of the CB42 legislation on the table for increasing school impact fees for developers in our county.

It is clear that HoCo developers have paid far less in impact fees over the years than developers in our neighboring counties - this obviously results in a budget deficit annually for school improvements/renovations, as well as for the critical need for additional schools to be built to ease the current overcrowding in our existing schools. Additionally, as it relates to proposal CR 112, by increasing these much needed school impact fees, those monies could be used more much more productively to support under performing schools and students within them, resulting in the need for fewer students to be moved. I am in full support of of the idea of closing the achievement gap that exists between lower income students and higher income students within the county, but oppose this goal through the proposed method of mass redistricting.

Alternate solutions must be considered (mandatory Head Start and Pre K programs, Training/Support programs for any parent that could benefit in order to better support their child, more affordable housing in areas of the county where schools are under capacity, building additions to over capacity schools, funneling additional funding to schools that are under performing to better support those students, considering a teacher swap policy where teachers from each school could teach at another school for a period of years to share and implement best practices at all schools across the county, and perhaps creating magnet schools to create schools of choice for families who would be interested in that.) The funds from CB42 could be used toward any of these alternate solutions, and are critical to getting HoCo in a position to best manage its continued year after year growth. Thank you for your consideration. Please vote yes on CB42.

Sincerley,

Elizabeth Colvin

Attached please find my written testimony with regard to the proposed legislation CB42-2019.

--  
Julia Zick  
301-356-5737

September 13<sup>th</sup>, 2019

To County Executive Calvin Ball and the Councilmembers on the Howard County Council,

I am writing to express my strong support for the proposed legislation CB42-2019 to increase the school facilities surcharge for developers in our county. This legislation is long overdue and desperately needed to help the county address issues of overcrowding and deferred maintenance. In addition, an increase to the developer surcharge would finally represent a more accurate accounting for the incremental cost of education associated with new residential development in the county. Current rates far underestimate the incremental cost of education of new development and put a significant financial burden and capacity strains on HCPSS.

Howard County attracts a large number of families willing to pay premium real estate prices in return for being able to send their children to HCPSS schools. As a result, developers directly benefit from the great reputation of HCPSS. However, the current developer surcharge does not adequately estimate the incremental cost of education associated with new development. HCPSS is dealing with significant overcrowding issues and deferred maintenance associated with capital funding constraints are a growing problem. Based on current projections and capital planning, these strains are expected to continue to grow and become more pressing in the foreseeable future. The developer surcharge should be covering the brunt of these strains given the direct correlation between increased development and overcrowding in our school system.

The current fee structure and especially the current assumptions on number of children per apartment are inadequate and do not even come close to presenting a realistic estimate of the number of students added to HCPSS as a result of new developments added. It is critical that zoning approvals are based on more accurate estimates of the incremental cost of education put on HCPSS as a result of development approvals granted. The developer surcharge needs to account for the need to build more schools and expand existing schools in order to accommodate additional students added into the system as a result of development activity.

Apart from building the new High School #13, it is critical that the county move forward with the Hammond High School Renovation and Addition and the Talbott Springs Elementary School Replacement projects without further delays (see Superintendent Martirano's FY21 Capital Budget & FY22-FY26 Capital Improvement Plan). The additional revenue from an increase in the developer surcharge would provide the county with much needed funding to support these critical capital projects.

If the county does not adopt the proposed legislation to increase the developer surcharge, the County risks damaging the excellent reputation of our school system as overcrowding continues and worsens and as deferred maintenance issues due to lacking capital budget funding accumulate over time.

I urge the Council to adopt the proposed legislation CB42-2019 or similar legislation that will require developers to cover a larger share of the incremental cost of education that results from newly approved developments. Support our students, teachers, and families by creating a more equitable fee structure.

Respectfully,

Julia Zick

**To:** CouncilMail  
**Subject:** Council Bill 42

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Good afternoon, Council Members,

I am a resident of Howard County, Elizabeth Broullire, 11660 Federal Street, Fulton, and I write you today to voice my opinion on Council Bill 42, to raise the school surcharge for builders of residential units.

I am strongly in favor of raising these fees charged to builders in order to support our school infrastructure, both existing and new. My children attend Fulton Elementary, the largest and one of the most overcrowded elementary schools in the county. We are facing a critical tipping point with the school system and overcrowding, yet building continues with some of the lowest fees compared to neighboring counties. Howard County is a desirable place to live, and one of the key factors is the great public school system. I fear the future of the public school system if action isn't taken to alleviate overcrowding.

Please choose to support the public school system, and our children and families who rely on it and value it. Please support keeping Howard County a desirable place to live. Please vote to raise the school surcharge for builders of residential units.

Thank you for your time and consideration on this very important matter.  
Kindest Regards,  
Elizabeth Broullire

Hello County Council members,

I am writing in support of CB42. It is overdue that we raise impact fees. All of our neighboring counties (Montgomery, PG, Anne Arundel and even Carroll county) charge far more than we do with no adverse effects on development. Howard County's Columbia and Ellicott City have consistently ranked high on best places to live lists. Raising the fees is not going to hurt our economy. In fact if we don't, quality of life will go down and we'll be dropping on the ranking lists as is already happening. It's a testament to our school system that they've been able to do so much with so little however I don't want to continue the practice of basically giving hand outs to developers at the expense of our children's educations, our property values (that are directly tied to HCPSS being a highly regarded school system as you know) road safety and quality of life. Let's not continue the decades long practice of selling ourselves short in this county. People want to live here. Let's continue to make it worth living here. Please raise the impact fees and significantly.

Thank you for your time and attention!  
Buffy Illum  
District 1

**Subject:** Vote in FAVOR of CB42-2019

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear County Council

Please vote in favor of CB42-2019 to increase developer fees that will increase the pool of funds to build new schools including the replacement for Talbott Springs ES. Replacing old, run down schools must be a priority for HoCo. And building new schools to alleviate overcrowding in existing schools must be a priority.

TSES was the #1 priority for replacement until a few days ago when HCPSS decided they didn't have the funds to do it. TSES must be replaced. It is old and moldy (smells like mold in parts of the school). My youngest son who is in high school and my oldest who is in college now spent 8 years combined at TSES.

Howard County must start charging developers higher fees like our neighboring counties do so that we can keep up with the cost of infrastructure replacement such as our schools and roads.

Thank you,

Susan Defibaugh  
21 year Howard County homeowner  
HCPSS parent

**Subject:** Council Bill 42-2019

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

To the members of the Howard County Council:

I would like to voice my support of the council bill 42-2019. It is well past time for the developers contribute in a meaningful way to the infrastructure in the county. The impact fees that have been in place are well below the fees of all surrounding counties and our current deficit is evidence that this is harming the quality of life here in the county.

Please vote to pass council bill 42-2019!

Regards,

Alice Marschner

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Hello,

Please consider this a show of support for CB42-2019. I believe the HCPSS budget shortfalls and portable classrooms speak for all of us in saying that it's time for builder fees to be on parity with the impact the developments have had in our county.

Thanks very much.  
- Drew Malone

Dear Howard County Council,

It seems fair to say that our county has had a set of tools to use to manage growth and that for a variety of reasons they haven't been as effective as expected. So, I applaud you for engaging so deeply in the complex work of managing infrastructure.

Raising the school facilities surcharge is one thing the Council can do to upgrade their tool set. Please do it. However, I don't know that \$6.80 is the right amount; I've heard it might be high enough to undermine your intent. I look forward to hearing your discussion on that point in your work session.

There are certainly other tools you will need to upgrade, and even some entirely new tools you'll need to add to your collection. One of the arguments against this bill is that the majority of student enrollment growth comes from resales, not new construction. That point alone is not enough to vote no on this bill, however. Instead, other legislation needs to come forward to address that.

Thank you for your consideration,  
Lisa Schlossnagle  
Fulton, MD

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

I am writing on behalf of CB42, to increase school facility surcharge fees to developers in Howard County. Please consider passing this bill as our schools are extremely overcrowded and in need of repair and expansion. It appears the county does not have the funds to make repairs/expansions already scheduled for the immediate future, making CB42 even more important. This bill is imperative to helping our students and saving our school system. Thanks you for you time and attention in this matter,  
Jen Thomas Member of District 1

Dear Howard County Council,

Thank you to Councilmembers Rigby Jung, Walsh, and Jones for introducing CB42-2019 to increase the school facilities surcharge on developers. Howard County schools are bursting at the seams, and the developers have been paying the lowest infrastructure fees in the DMV for far too long. As a parent and a taxpayer I am so weary of the annual battles for school funding, in which critical capital improvements are frequently the casualty. Talbott Springs Elementary School Replacement, High School 13, new elementary schools, and the Oakland Mills, Hammond High and Centennial High renovations/additions have been deferred for far too long.

Sincerely,

Leslie Toussaint  
Ellicott City, MD 21042

Dear Members of the County Council,

I am writing to urge you to pass council bill 42. Our county is in desperate need of higher developer fees to pay for more schools, and infrastructure that is falling behind our rapid population growth. We can't afford to keep under charging when the surrounding counties are charging several times the rate we are. It's not fair to our future generations to allow this to go on! Our schools won't continue to be world class without the fees to support our students. PLEASE do the right thing! We elected you to make the tough decisions.

Sincerely,

Niki McGuigan

District 1

[Note: This email originated from outside of the organization. Please only click on links or attachments if you know the sender.]

Dear County Council Members,

I am writing to support the Council Bill 42. It is a long overdue to raise the development impact fee to support infrastructure and school.

As you know in the 2021 HCPSS capital budget, we are lacking of extra money to support Talbot Spring Elementary School and Hammond High School. I wish this increased revenue will help the school system to combat the overcrowding and differed maintenance issues.

Thanks.

Chao

Council:

I strongly support Council Bill 42, raising the school surcharge for builders of residential units in Howard County. It's embarrassing how low the fees in our county have been compared to other counties. Time to make it right and pass CB42.

Julia T. Kovacs

HOWARD COUNTY  
CHAMBER

6240 Old Dobbin Lane ■ Suite 110 ■ Columbia, MD 21045

September 10, 2019

Ms. Christiana Rigby  
Chair, Howard County Council  
George Howard Building  
3430 Court House Drive  
Ellicott City, MD 21043

***RE: CB 42 - Developer Surcharge Legislation***

Dear Councilwoman Rigby:

The topic of school construction, funding, and development has been permeating throughout Howard County for the better part of two years. The subject has impacted the Adequate Public Facilities Ordinance (APFO) resulting in the extremely stringent policy we operate under currently. On August 23, the Council filed CB 42, which if passed, would raise the fee to \$6.80 SF, an increase that would make Howard County the highest in the state and increase the price of an average new housing unit by approximately 4% (\$28K). Proponents will cite the fact Howard County's current fee is significantly less than neighboring counties. What is not stated is that not all counties calculate their funds the same. Some, like Howard County make the assessment on the square footage bases while others on the number of units. Besides the surcharge, Howard County assesses fees for roads and Moderate-Income Housing Units (MIHU) whereas other jurisdictions have lump sum fees.

Beyond fee calculations, the Chamber is concerned that the proposed legislation will impact future development and housing affordability which impacts roads and talent attraction when employees are forced to live a significant distance from work. Specifically, it impacts those in the middle-income housing bracket (\$300K - \$500K) as the average new home in the county is \$700K. This leads to our next concern in that this is a regressive tax that disproportionately increases housing cost for those on the lower end of the cost spectrum.

Previous concerns aside, the Chamber is also concerned in that there has been not been a publicly released fiscal analysis further justifying the \$6.80 fee and the corresponding \$150M anticipated revenue figure.

The Chamber understands the conundrum the Council is facing in funding education facilities. However, we must remember the county didn't come to this fiscal challenge overnight. Nor did it arrive at this situation on the backs of one group. Consequently, the solutions should be comprehensive in nature and contemplate a multitude of options. As such, the Howard County Chamber respectfully ask that you do not pass this legislation in its current form.

Respectfully,
