

# County Council of Howard County, Maryland

2021 Legislative Session

Legislative Day No. 5

## Resolution No. 41 -2021

Introduced by: The Chairperson at the request of the County Executive

A RESOLUTION approving a Financial Assurance Plan for Howard County's National Pollutant Discharge Elimination System, Municipal Separate Storm Sewer System permit programs, in accordance with Section 4-202.1 of the Environment Article of the Annotated Code of Maryland; and requiring certain copies be sent to the Maryland Department of the Environment.

---

Introduced and read first time \_\_\_\_\_, 2021.

By order \_\_\_\_\_  
Theo Wimberly, Acting Administrator

Read for a second time at a public hearing on \_\_\_\_\_, 2021.

By order \_\_\_\_\_  
Theo Wimberly, Acting Administrator

This Resolution was read the third time and was Adopted\_\_\_, Adopted with amendments\_\_\_, Failed\_\_\_, Withdrawn\_\_\_, by the County Council on \_\_\_\_\_, 2021.

Certified By \_\_\_\_\_  
Theo Wimberly, Acting Administrator

Approved by the County Executive on \_\_\_\_\_, 2021.

---

Calvin Ball, County Executive

NOTE: [[text in brackets]] indicates deletions from existing law; TEXT IN SMALL CAPITALS indicates additions to existing law; ~~Strike-out~~ indicates material deleted by amendment; Underlining indicates material added by amendment

1           **WHEREAS**, related to the Watershed Protection and Restoration Fee, Howard County is  
2 required to file a Financial Assurance Plan (“Plan”), approved by the local governing body, with  
3 the Maryland Department of the Environment (“MDE”), in accordance with § 4-202.1 of the  
4 Environment Article of the Annotated Code of Maryland (the “State Law”); and  
5

6           **WHEREAS**, the County has worked with MDE over the past several months to craft a Plan  
7 that projects and describes actions and financial resources and costs related to stormwater  
8 management in Howard County over the two-year period following the filing date of the Plan; and  
9

10           **WHEREAS**, previous Plans have been approved by the passage of Council Resolution No.  
11 92-2016, Council Resolution No. 185-2015, and Council Resolution No. 45-2019; and  
12

13           **WHEREAS**, the State law requires that the County file a Plan with MDE and that the  
14 governing body of the County approve the Plan prior to filing with MDE.  
15

16           **NOW, THEREFORE, BE IT RESOLVED** by the County Council of Howard County,  
17 Maryland, this \_\_\_\_\_ day of \_\_\_\_\_, 2021, that it hereby approves the  
18 Plan, substantially in the form attached, as a projection of actions, funding, and costs of Howard  
19 County’s stormwater management program over the two-year period following the filing date of  
20 the Plan.  
21

22           **AND BE IT FURTHER RESOLVED** that a copy of this Resolution and the Plan be  
23 sent to the Maryland Department of the Environment, 1800 Washington Boulevard, Baltimore,  
24 MD 21230.

VERSION 8/20/20

## Howard County Financial Assurance Plan 2020: Executive Summary

The National Pollutant Discharge Elimination System (NPDES) Municipal Separate Storm Sewer System (MS4) permit issued to Howard County on December 18, 2014, mandated that the County implement restoration efforts for 20% of its total impervious surface area that has not already been restored to the maximum extent practicable (MEP) by December 17, 2019. The submission of Howard County's Financial Assurance Plan (FAP) to the Maryland Department of the Environment (MDE) fulfills requirements specified in the Maryland Article – Environment, Section 4-202.1. This plan is being filed to MDE in order to document all actions implemented by Howard County to comply with the NPDES MS4 permit and demonstrate the County's ability to pay for these activities through the Watershed Protection and Restoration Fund.

Howard County implemented its stormwater utility fee, the Watershed Protection and Restoration Fee (WPRF), on July 1, 2013, as required by state law. Upon implementation of the Fee and the Watershed Protection and Restoration Fund, the County increased existing efforts to plan, design, construct, and monitor restoration projects necessary to meet the NPDES MS4 permit's 20% restoration goal. Per MDE guidance, all restoration projects implemented following June 10, 2010 are considered restoration that applies to the County's 20% restoration goal. In comments dated August 7, 2020, MDE acknowledges that Howard County's restoration requirement for the 2014-2019 permit term is 20% of its 11,019-acre baseline, or 2,204 acres. MDE also acknowledges that the County has exceeded its 20% requirement by completing additional impervious acres of restoration and "...is commended for this significant achievement."

This FAP reflects completed actions taken by the County during the 2014-2019 permit term and planned actions projected to meet the estimated restoration requirement of the next permit term, which MDE has stated is scheduled to begin sometime in calendar year 2021. Based on the [Maryland's Phase III Watershed Implementation Plan \(WIP\)](#), the estimated restoration requirement over the five-year permit term is 10% of the impervious surface area that has not already been restored to the MEP, implemented at a rate of 2% per year.

The County's current permit, which expired on December 17, 2019, is administratively continued and remains in effect until a new permit is issued. Therefore, the County continues to implement the numerous programs required by the MS4 permit. Best management practices (BMPs) will continue to be utilized to complete additional restoration work and improve water quality, including stream restoration, outfall stabilization, tree planting, construction of new BMPs, retrofitting existing BMPs, street sweeping, inlet cleaning, and septic system upgrades, pump-outs, and connections to the sanitary sewer system. Per MDE direction, any restoration credit for projects completed after the County met the restoration requirement for the 2014-2019 permit term will be recalculated using the Draft "Accounting for Stormwater Wasteload Allocations and Impervious Acres Treated: Guidance for National Pollutant Discharge Elimination System Stormwater Permits" document (June 2020) and will apply to the restoration requirements in the next permit term. The County also continues to research and develop the voluminous electronic data necessary to meet the ever-expanding geodatabase reporting requirements of the MS4 permit.

**Article 4-202.1(j)(1)(i)1: Actions that will be required of the county or municipality to meet the requirements of its National Pollutant Discharge Elimination System Phase I Municipal Separate Storm Sewer System Permit.**

Note: To identify all "actions" required under the MS4 permit, provide an executive summary of the jurisdiction's MS4 programs. See MDE's FAP Guidance. For proposed actions to meet the impervious surface restoration plan, fill in the table below.

**Check with MS4 Geodatabase:**

Type, class, impervious acres, implementation cost and implementation status should match the various geodatabase tables for BMPs (AltBMPLine, AltBMPPoint, AltBMPPoly, and RestBMP) - aggregated by type and status.

**Notes:**

1. Use BMP domains from the MS4 Geodatabase.
2. Complete, Under Construction, Planning, or Proposed.
3. Use Fiscal Year (FY)
4. For street sweeping indicate the annual frequency that the streets are swept, and for storm drain or catch basin cleaning report the pounds of material removed.
5. Average IMP ACRES for Operational BMPs should be the average of BMP 1 + the average of BMP 2, etc.  
IMPL COST is a summation and not an average.

**Check with MS4 Geodatabase:**

Rest BMP ID, type, class, number of BMPs, impervious acres, built date, implementation cost and implementation status should match the various geodatabase tables for BMPs (AltBMPLine, AltBMPPoint, AltBMPPoly, and RestBMP)-- aggregated by type and status.

**Notes:**

1. Use BMP domains from the MS4 Geodatabase.
2. Complete, Under Construction, Planning, or Proposed.
3. For street sweeping indicate the annual frequency that the streets are swept, and for storm drain or catch basin cleaning report the pounds of material removed.
4. Average IMP ACRES for Operational BMPs should be the average of BMP 1 + the average of BMP 2, etc.  
IMPL COST is a summation and not an average.

VERSION 8/20/20

APRP	Permeable Pavements
FB	Forest Buffer
FBIO	Bioretention
FSND	Sand Filter
FUND	Underground Filter
IBAS	Infiltration Basin
MIBR	Infiltration Berm
IMPP	Impervious Surface Elimination (to pervious)
MIDW	Dry Well
MMBR	Micro-Bioretention
MRNG	Rain Gardens
