Dear Leaders,

Thank you for hearing the concerns of your constituents. I understand that a BGE easement may be traversing through Rockburn Park and a meeting is to be held to discuss this. I have great concern for the flora and fauna that would be disturbed from laying underground wire through our lovely park. The most alarming aspect of this would be the cutting of any trees in the park. So much habitat is destroyed with development that maintaining what we have is vital for a wide variety of eco important insects, birds, mammals etc. I urge you to find a solution to increasing broadband that won't disturb our park's habitats.

Thank you,
Valerie Swan
