Subject: Clarification in the testimony for CR40
Date: Friday, May 3, 2024 11:30:59 AM

Good morning,

The Office of Transportation would like to clarify one of the amounts contained in the chart provided with the testimony for CR40-2024. See the below note:

“Please note that the Funding Plan table included in the Transit Assurances has a math error. The required local match for the FY 25 LU grant (Total Project Amount \$2,908,347.50) is not currently known, but was estimated incorrectly as \$581,669.50. A more accurate estimate for the required local match for that amount would be \$727,086.87. Despite it being a higher number, it will not increase costs to the County because:

- We will not receive the entire grant amount applied for. (We anticipate receiving only \$1,900,000 with a required local match of \$475,000.00), but we put in for the highest possible grant award, just in case.

- Because we already overmatch this grant, any increase in required local match will just mean a shift in the funds from the overmatch amount to the required local match amount.

We apologize for any confusion this may have caused. If you have any questions, please contact Carrie Anderson-Watters @ 410-313-3442 or David Cookson @ 410 - 313 - 3842.”

Let us know if you have any questions.

Thanks,

Jen
