## ATTACHMENT 1

The Adequate Public Facilities Ordinance (APFO) School Capacity charts are utilized as part of the growth management process of Howard County for new residential developments. County code requires that the school system provide an annual report identifying the capacity utilization for each elementary school (Grade K-5), elementary school region, middle school (Grade 6-8) and high school (Grade 9-12) school.

The attached School Capacity charts list schools and elementary regions as “C” (constrained) to new future residential development if the capacity utilization developed for the FY 2025 Capital Budget and Capital Improvement Program/Redistricting Process exceeds:

- 105 percent for elementary schools,
- 105 percent for elementary regions,
- 110 percent for middle schools, or
- 115 percent for high schools.

These calculations are based on the capacities listed in the most recent Board Requested Capital Improvement Program and the projections developed in the Spring of 2023. Individual schools or elementary regions that show a capacity utilization less than the percentage noted above are considered “open” for new residential development. Constrained schools are indicated in the chart with the letter “C” and open schools are left blank. For SY 2027-28, there are 15 elementary, six middle and no high schools, and one elementary school region (which impacts an additional three elementary schools), for a total of 18 elementary schools, listed as constrained.

Since 2019, CB-1-2018 specifically requires the following information to be provided to the County Council for each school:

- State and local capacities of the facility;
- The date of the last redistricting which impacted the attendance area of that school;
- For any projected increase in enrollment, an indication of what portions of the increase are attributed to sales or rental turnover of existing residential units, new development, and other factors; and
- For any school designated as open on the school capacity chart based on a capital improvement project or proposed redistricting associated with a capital improvement project:
  - a. Current and future funding assumptions for the capital improvement project(s);
  - b. Future redistricting assumptions associated with the capital improvement project; and
  - c. An explanation of any capacity utilization changes based on (a) or (b).

The Ordinance also stipulates that the County Council and Board of Education hold a joint special work meeting regarding schools or school regions that have reached 95 percent capacity utilization and are projected to exceed 110 percent capacity utilization within five years.

The Howard County Council recently adopted an updated General Plan, HoCo By Design. As a twenty year planning document, the changes to development patterns recommended in this plan will be implemented over many years. Additionally, a committee will be formed soon to review the Adequate Public Facilities Ordinance.

Note: The State Rated Capacities (SRC) are current as of the writing of this report. Review and update of SRCs occur individually on an as needed basis (ex. after additions, new schools). Additionally, the Interagency Commission on School Construction has a committee reviewing SRCs statewide. As of March 2020, updated SRCs for the elementary level were released and are reflected below. The methodology to calculate SRCs and/or the SRCs for middle and high schools may also be updated in the future.

**III. For any projected increase in enrollment, an indication of what portions of the increase are attributed to sales or rental turnover of existing residential units, new development, and other factors**

These charts are based on the projection developed in the spring of 2023 using the 2023-24 boundaries and are displayed here. New projections are developed each year in the spring with new birth, housing, and student yield data and all approved boundaries.

Additional factors contributing to a school’s enrollment projection: size of cohort rising to next level, cohort survival rates, births (5 years ago) in attendance area, birth to kindergarten survival rate, out of district students (can be +/-), students who moved into an attendance area between birth and 5 years old, and adjustments based on prior year’s projection accuracy. New construction is based on the first year of occupancy only; after the first year housing units are integrated into the existing housing resale, pre-K move-in, and apartment turnover calculations.

**V. Upon receiving written notification from the Howard County Public School System that a school or school region has reached 95 percent capacity utilization and is projected to exceed 110 percent capacity utilization within five years as well as the Board of Education's proposed solution to address the projected overcrowding, the County Council shall hold a joint special work meeting.**

Schools that have reached 95 percent capacity utilization and are projected to exceed 110 percent capacity utilization within five years are listed below. Staff’s assessment of these enrollment projections was presented in the 2023 Feasibility Study, which influenced the FY2024 Capital Budget. Both the Feasibility Study and all versions of the Superintendent’s and Board’s capital budgets were provided to the County Council.

The actual 2023 or projected 2028 capacity utilization does not include the temporary capacity gained by the use of relocatable classrooms. The relocatable counts do not include the Board approved placement of additional relocatable classrooms during the summer of 2024. The potential solutions listed are from the 2023 Feasibility Study and capital planning process, reflected in the Board Requested Long-Range Master Plan (LRMP) shown on the previous page.

**95% or greater capacity utilization in 2023 and projected to be 110% capacity utilization by 2028**
