

Office of the County Auditor

Auditor's Analysis

Council Resolution No. 113-2025

Introduced: June 3, 2025

Auditor: Diane Zagorski-Kelly

Fiscal Impact:

The fiscal impact of this legislation is determined by the number and type of units developed. Changes in schools that are constrained are noted in **Attachment A** for school year 2028-2029 and will determine which development projects are allowed to proceed through the Adequate Public Facilities Ordinance (APFO) process. *We have an open inquiry with the Administration to identify the anticipated number of units that will pass the school capacity test based on the revised capacity chart.*

Impacts, in the year of occupancy, for units passing include revenues generated from local income tax, property taxes, one-time revenues such as school surcharge fees, County transfer, recordation, and building excise taxes. Other revenues include permitting fees. Offsetting costs of development include annual operating costs per pupil based on student yield from each unit developed and potential capital costs for related infrastructure. The year in which the revenues or expenditures will be generated is unknown due to permitting, construction and sales durations.

Purpose:

The Howard County Public School System (HCPSS) is required to prepare an annual School Capacity Chart. Based on enrollment projections and various criteria, HCPSS will designate school districts and regions as Open or Closed for residential development. This legislation is to adopt the School Capacity Chart, in accordance with Section 16.1103 (C) of the County Code.

The “2025 APFO School Capacity Charts” included as Exhibit A in Council Resolution 113-2025 are one set of criteria used by the Department of Planning and Zoning to determine if there are Adequate Public Facilities to support a proposed development.

Other Comments:

Concurrent with the School Capacity Chart proposed in this legislation, Council Resolution 114-2025 (relating to the Housing Unit Allocation Chart) was also introduced.

Council Bill 1-2018 established the current School Capacity parameters in Section 16.1110(y)(2) and Section 16.1105(C)(7)(ii)b of the County Code, noted below:

- School Region – Open if projected enrollment is below 105 percent of capacity
- Elementary School – Open if projected enrollment is below 105 percent of capacity
- Middle School – Open if projected enrollment is below 110 percent of capacity
- High School – Open if projected enrollment is below 115 percent of capacity
- Held in School Wait Bin maximum – Seven years

The HCPSS advised a redistricting staff report will be presented to the Board of Education on July 17, 2025.

Attachment A provides a list of schools with changes to/from “constrained” status for school year 2028-2029 as indicated on the FY 2025 vs. FY 2026 APFO School Capacity Charts.

Attachment B provides a list of schools with capacity changes for years 2028-2030 as indicated on the FY 2025 APFO School Capacity Charts compared to the FY 2026 APFO School Capacity Charts.

Attachment C provides an overview of school capacity, projected enrollment, percent of capacity, and constrained/open status for all HCPSS as shown on the APFO reports presented in CR128-2023, CR180-2023, CR76-2024, and CR113-2025.
