**Psychologist and Command Consultant, Subject Matter Expert for Traumatic Brain Injury and Psychological Health, National Naval Medical Center, Bethesda, MD.**

Created, implemented, and managed the innovative Traumatic Stress and Brain Injury Program to provide a continuum of clinical assessment and treatment services, education and training, and clinical research.

Developed specialized casualty mental health care and blast injury assessment and treatment services. Worked closely with leaders at the Navy Bureau of Medicine and Surgery on policy development and implementation. Demonstrated leadership and expertise in the development of concepts of operations, policy development, program analysis, program development and program management, and business practices. Developed budget and staffing requirements and worked closely with the Directorate for Resources. Responded to taskers related to Traumatic Brain Injury (TBI) and/or Psychological Health (PH). Solved complex problems and makes recommendations to leadership. Made recommendations regarding implementing policies, report recommendations, and directives from leaders in the Military Health System (Health Affairs and Tricare Management Activity) and Navy Medicine. Contributed to Dr. Casscells' (Assistant Secretary of Defense) MHS dashboard project for TBI-PH through the Office of Strategy Management.

Functioned in both internationally recognized subject matter expert and leadership roles representing traumatic brain injury and mental healthcare on the various settings including multidisciplinary care teams, task forces, working groups, and with the Defense Centers of Excellence for Psychological Health and Traumatic Brain Injury. Primarily responsible for strategic planning, policy development, assessing, planning, directing, implementing, supervising and evaluating mental health, brain injury, and neuropsychological assessment, treatment, care and all related activities with a full range of patients, including the most complex cases. Strong written and oral presentation skills producing reports, briefs, point papers, and white papers for review by senior DoD and VA leadership. Significant experience communicating with the media, senior leadership, and foreign dignitaries.

Provided training and education on matters related to traumatic brain injury, blast injury, casualty mental health, and compassion fatigue. Served as a research consultant and collaborator to federal, VA, and private academic medical center partners. Served as a forensic consultant and expert witness in military justice and Department of Justice cases.

Provided clinical services for inpatient and outpatient cases involving neuropsychological testing and psychological testing. Provided

consultation on mental health services for patients being treated for traumatic stress, traumatic brain injury (TBI), and both traumatic stress (and other mental health disorders) and brain injury. Cases originated from Mental Health, Neurology, Primary Care, Deployment Health, and other departments and directorates within and outside of the National Naval Medical Center, including Annapolis, Quantico, and Patuxent River, as well as patients arriving in the area via worldwide medical evacuations (Medevacs).

In addition to the above-mentioned services, supported program development in the outpatient clinic to meet the changing needs of active duty, retired, and dependent members. Developed the Dialectical Behavior Therapy Program and trained over 100 staff members in this treatment modality. Provided clinical supervision to medical students, psychology, psychiatry, and social work staff and trainees. Served as a member of the Institutional Review Board and served the Mental Health Department Research Coordinator and the Traumatic Brain Injury and Psychological Health Research Coordinator.

Provided consultation to and expert advice and training on psychological topics, serving as an expert in the fields of TBI and psychological health to Federal and other agencies including members of Congress; the Department of Defense; the Department of Veterans Affairs; the Defense Centers of Excellence for Psychological Health and Traumatic Brain Injury; the Institute of Medicine; Federal, State, and Local disaster teams; national and local professional organizations, and to hospital directorates, department heads, and other personnel within and outside the hospital fostering interagency coordination. Functioned effectively with a high degree of autonomy in communication/coordination with command leadership.
