Dear County Council members,

As a leader with PATH, I am asking you to **please vote against CB 52, the Stormwater Fee Repeal Bill**. The current stormwater fee is a progressive way to address harmful runoff into the Chesapeake Bay, and is not an unnecessary burden to taxpayers. The fee supports programs such as the READY Program (created by PATH, the Alliance for the Chesapeake Bay, and the County) to address stormwater remediation and employ and develop Howard County youth. There are many priorities this year and in the years to come that will be critical to the health and success of our county that the general fund supports, such as increasing educational opportunities, expanding transportation for seniors and other residents of the county, and ensuring the availability of affordable housing for current and future residents. Let's keep the general fund strong by keeping the Stormwater Fee intact. Thank you for your support!

The current stormwater fee is a progressive way to address harmful runoff into the Chesapeake Bay, and is not an unnecessary burden to taxpayers. The fee supports programs such as the READY Program (created by PATH, the Alliance for the Chesapeake Bay, and the County) to address stormwater remediation and employ and develop Howard County youth. There are many priorities this year and in the years to come that will be critical to the health and success of our county that the general fund supports, such as increasing educational opportunities, expanding transportation for seniors and other residents of the county, and ensuring the availability of affordable housing for current and future residents. Let's keep the general fund strong by keeping the Stormwater Fee intact. Thank you for your support!

Dear County Council members,

Please vote against CB 52, the Stormwater Fee Repeal Bill. The current stormwater fee is a progressive way to address harmful runoff into the Chesapeake Bay, and is not an unnecessary burden to taxpayers. The fee supports programs such as the READY Program (created by PATH, the Alliance for the Chesapeake Bay, and the County) to address stormwater remediation and employ and develop Howard County youth. There are many priorities this year and in the years to come that will be critical to the health and success of our county that the general fund supports, such as increasing educational opportunities, expanding transportation for seniors and other residents of the county, and ensuring the availability of affordable housing for current and future residents. Let's keep the general fund strong by keeping the Stormwater Fee intact. Thank you for your support!

The current stormwater fee is a progressive way to address harmful runoff into the Chesapeake Bay, and is not an unnecessary burden to taxpayers. The fee supports programs such as the READY Program (created by PATH, the Alliance for the Chesapeake Bay, and the County) to address stormwater remediation and employ and develop Howard County youth. There are many priorities this year and in the years to come that will be critical to the health and success of our county that the general fund supports, such as increasing educational opportunities, expanding transportation for seniors and other residents of the county, and ensuring the availability of affordable housing for current and future residents. Let's keep the general fund strong by keeping the Stormwater Fee intact. Thank you for your support!

As a leader with PATH, I am asking you to **please vote against CB 52**, the Stormwater Fee Repeal Bill. The current stormwater fee is a progressive way to address harmful runoff into the Chesapeake Bay, and is not an unnecessary burden to taxpayers. The fee supports programs such as the READY Program (created by PATH, the Alliance for the Chesapeake Bay, and the County) to address stormwater remediation and employ and develop Howard County youth. There are many priorities this year and in the years to come that will be critical to the health and success of our county that the general fund supports, such as increasing educational opportunities, expanding transportation for seniors and other residents of the county, and ensuring the availability of affordable housing for current and future residents. Let's keep the general fund strong by keeping the Stormwater Fee intact. Thank you for your support!

Dear County Council members,

As a leader with PATH, I am asking you to **please vote against CB 52**, the Stormwater Fee Repeal Bill. The current stormwater fee is a progressive way to address harmful runoff into the Chesapeake Bay, and is not an unnecessary burden to taxpayers. The fee supports programs such as the READY Program (created by PATH, the Alliance for the Chesapeake Bay, and the County) to address stormwater remediation and employ and develop Howard County youth. There are many priorities this year and in the years to come that will be critical to the health and success of our county that the general fund supports, such as increasing educational opportunities, expanding transportation for seniors and other residents of the county, and ensuring the availability of affordable housing for current and future residents. Let's keep the general fund strong by keeping the Stormwater Fee intact. Thank you for your support!

Dear County Council members,

As a leader with PATH, I am asking you to **please vote against CB 52**, the Stormwater Fee Repeal Bill. The current stormwater fee is a progressive way to address harmful runoff into the Chesapeake Bay, and is not an unnecessary burden to taxpayers. The fee supports programs such as the READY Program (created by PATH, the Alliance for the Chesapeake Bay, and the County) to address stormwater remediation and employ and develop Howard County youth. There are many priorities this year and in the years to come that will be critical to the health and success of our county that the general fund supports, such as increasing educational opportunities, expanding transportation for seniors and other residents of the county, and ensuring the availability of affordable housing for current and future residents. Let's keep the general fund strong by keeping the Stormwater Fee intact. Thank you for your support!

The current stormwater fee is a progressive way to address harmful runoff into the Chesapeake Bay, and is not an unnecessary burden to taxpayers. The fee supports programs such as the READY Program (created by PATH, the Alliance for the Chesapeake Bay, and the County) to address stormwater remediation and employ and develop Howard County youth. There are many priorities this year and in the years to come that will be critical to the health and success of our county that the general fund supports, such as increasing educational opportunities, expanding transportation for seniors and other residents of the county, and ensuring the availability of affordable housing for current and future residents. Let's keep the general fund strong by keeping the Stormwater Fee intact. Thank you for your support!

Dear County Council members,

As a leader with PATH, I am asking you to **please vote against CB 52**, the Stormwater Fee Repeal Bill. The current stormwater fee is a progressive way to address harmful runoff into the Chesapeake Bay, and is not an unnecessary burden to taxpayers. The fee supports programs such as the READY Program (created by PATH, the Alliance for the Chesapeake Bay, and the County) to address stormwater remediation and employ and develop Howard County youth. There are many priorities this year and in the years to come that will be critical to the health and success of our county that the general fund supports, such as increasing educational opportunities, expanding transportation for seniors and other residents of the county, and ensuring the availability of affordable housing for current and future residents. Let's keep the general fund strong by keeping the Stormwater Fee intact. Thank you for your support!

Dear County Council members,

As a leader with PATH, I am asking you to **please vote against CB 52**, the Stormwater Fee Repeal Bill. The current stormwater fee is a progressive way to address harmful runoff into the Chesapeake Bay, and is not an unnecessary burden to taxpayers. The fee supports programs such as the READY Program (created by PATH, the Alliance for the Chesapeake Bay, and the County) to address stormwater remediation and employ and develop Howard County youth. There are many priorities this year and in the years to come that will be critical to the health and success of our county that the general fund supports, such as increasing educational opportunities, expanding transportation for seniors and other residents of the county, and ensuring the availability of affordable housing for current and future residents. Let's keep the general fund strong by keeping the Stormwater Fee intact. Thank you for your support!

Dear County Council members,

As a leader with PATH, I am asking you to **please vote against CB 52**, the Stormwater Fee Repeal Bill. The current stormwater fee is a progressive way to address harmful runoff into the Chesapeake Bay, and is not an unnecessary burden to taxpayers. The fee supports programs such as the READY Program (created by PATH, the Alliance for the Chesapeake Bay, and the County) to address stormwater remediation and employ and develop Howard County youth. There are many priorities this year and in the years to come that will be critical to the health and success of our county that the general fund supports, such as increasing educational opportunities, expanding transportation for seniors and other residents of the county, and ensuring the availability of affordable housing for current and future residents. Let's keep the general fund strong by keeping the Stormwater Fee intact. Thank you for your support!

Dear County Council members,

As a leader with PATH, I am asking you to **please vote against CB 52**, the Stormwater Fee Repeal Bill. The current stormwater fee is a progressive way to address harmful runoff into the Chesapeake Bay, and is not an unnecessary burden to taxpayers. The fee supports programs such as the READY Program (created by PATH, the Alliance for the Chesapeake Bay, and the County) to address stormwater remediation and employ and develop Howard County youth. There are many priorities this year and in the years to come that will be critical to the health and success of our county that the general fund supports, such as increasing educational opportunities, expanding transportation for seniors and other residents of the county, and ensuring the availability of affordable housing for current and future residents. Let's keep the general fund strong by keeping the Stormwater Fee intact. Thank you for your support!
